

S.2 GEOGRAPHY HOLIDAY WORK

Item 1

In your school geography project, the class decided to set up a mini weather station where you were able to monitor some weather elements. These among others included rainfall, temperature and wind direction. This enabled your team to generate the following statistics.

Climate information of station Y

Month	J	F	M	A	M	J	J	A	S	O	N	D
Temp (c°)	30	30	28	28	27	29	29	27	27	28	29	30
Rainfall(mm)	12	18	87	180	200	150	100	160	140	120	80	40

You have been chosen by the class to interpret and discuss the above information to the rest of the school.

Task

- a)** Using the information in the table, draw a suitable statistical diagram to represent the information.
- b)** Describe the influence of the elements mentioned in the table and above text on human activities in your area.

Item 2

Mount Rwenzori is a famous mountain in East Africa. You are a geography student conducting research on East Africa's mountains part of the information. You have gathered relates to the formation of the mountains.

Task

- a)** Name and describe the process of formation of Mt. Rwenzori.
- b)** Explain the dangers facing people living around Mt. Rwenzori.

Item 3

A group of foreign investors came to East Africa to attend an investment conference organized by the East African community. During the conference, they are to be presented with information about East Africa's vast investment potential. Your class has been awarded the opportunity to send a representative to describe East Africa's relief features and their economic potentials.

Task

- a)** Name and describe East Africa's main relief regions.
- b)** Describe the potential economic activities that can be carried out in each of the regions.
