

## **S.1 CHEMISTRY**

### **Item 1**

A senior one learner went to the laboratory but the laboratory attendant refused him to enter on condition that he states ten laboratory rules and regulations which he did not remember.

#### **Task:**

As a chemistry learner, help the senior one learner by stating the ten Laboratory rules and regulations and why as to them should be followed.

### **Item 2**

Many youths are not employed largely because there are a lot of un exploited opportunities which chemistry addresses. In addition, there are some challenges in our society that can be solved using the knowledge of chemistry so, many learners in your school and school around do not like studying chemistry and they have many reasons among which is that chemistry is hard.

#### **Task:**

As a chemistry and society specialists, design a simple presentation to present to P.7 learner showing how chemistry is used in our society to earn a living and solve economic challenges.
