

2. Read the passage below and answer the questions that follow.

The Power of Curiosity.

As students embark on their journey through secondary schools, they are presented with a world of opportunities and challenges. It is a time of self-discovery and growth, where each student has the potential to shape their own future. One of the key factors that can greatly influence this transformation is curiosity – the insatiable desire to explore, learn, and understand the world around us.

Curiosity is a powerful driving force that fuels creativity and innovation. It encourages students to ask questions, seek answers, and challenge conventional wisdom. By nurturing their curiosity, secondary school kids can unlock their full potential and make the most of their educational experience.

When students approach their studies with curiosity, they open themselves up to new perspectives and ideas. This not only enhances their understanding of academic subjects but also fosters critical thinking and problem-solving skills. By being curious, they can connect seemingly unrelated concepts, leading to groundbreaking insights and discoveries.

Moreover, curiosity extends beyond the classroom. It pushes students to explore extracurricular activities, join clubs, and engage in volunteer work. Through these experiences, students can discover their passions, build meaningful relationships, and develop essential leadership skills.

Embracing curiosity also means embracing failure. It is through the pursuit of knowledge and exploration that students will encounter challenges and setbacks. However, rather than seeing these as obstacles, curiosity allows them to view failures as learning opportunities. This resilience will serve them well beyond their secondary school years, helping them thrive in an ever-changing world.

Questions:

- i. How does curiosity fuel creativity and innovation among secondary school students?
.....
.....
.....
- ii. What are the benefits of approaching studies with a curious mindset during your time in secondary school?
.....
.....
.....
